Caminho de Cora Coralina

The Caminho de Cora Coralina is a long trail more than 300 kilometers long that connects tourist cities in Goiás. The stretch goes back to the trails opened by bandeirantes who discovered many different riches in the lands of the Goyazes Indians, forming the first settlements and cities of our state.

The first path traveled on our soil inspired the creators of the Cora Coralina's Path, who see in this path more than a tourist product, but a true business card of the state of Goiás: a mixture of our beautiful nature, the poetic intelligence of our people, the remarkable presence of our history in each place, the faith that drives the pilgrimage and the discovery, and the gastronomy that represents all the receptivity and hospitality of the Goiás people

Walk, ride a bike, or ride a horse along Cora's Path and get to know a little of the history of Goiás, where we come from, how we are, what we like, and what we believe in. Experience a little bit of each experience along the Way and allow yourself to get to know yourself in the middle of the exuberance of the cerrado (savannah), walked by the poetry of Cora Coralina, a simple woman, a sweet seller from Vila Boa de Goiás, who had a schism with words and had her verses collected and published in books after she turned 70, becoming one of the most important representatives of the Goiás culture.

**Let's mix nature with history,
poetry, gastronomy and faith!**
